-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 28 December 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Specifically, line 3 of claim 8 state "triggering one of a plurality of power control mechanisms". However, it is not clear whether the triggered power control mechanism is the first power control mechanism or the second power control mechanism. Correction or clarification to the claim is therefore required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Mittal et al, Patent No. 5,719,800.

As to claim 8, Mittal et al teach monitoring an activity level of a processor to determine a power state, triggering one of a plurality of power control mechanisms, activating a first power control mechanism if the power state meets a first threshold,

Art Unit: 2116

monitoring a status associated with the first power control mechanism, and activating a second power control mechanism responsive to the monitored status (col. 5 lines 1-43 and col. 14 line 58 – col. 15 line 3).

As to claim 9, Mittal et al teach the status is a counter that indicates a level of power control provided by the first power control mechanism and activating the second power control mechanism responsive to the counter reaching a threshold value (col. 6 lines 13-49).

As to claim 10, Mittal et al teach the counter tracks a number of times the first power control mechanism is activated or a duration for which the first power control mechanism is activated (col. 5 lines 13-43 and col. 6 line 13 – col. 7 line 18).

As to claim 11, Mittal et al teach adjusting instruction throughput for the processor, responsive to the power state reaching the first threshold (col. 4 lines 19-37 and col. 5 lines 13-43).

As to claim 12, Mittal et al teach adjusting an operating point of the processor, responsive to the monitored status (col. 14 line 58 – col. 15 line 15).

Claims 1-7 and 13-19 are directed to the system implementing the method of claims 8-12. Mittal et al teach the method as set forth in claims 8-12. Therefore, Mittal et al also teach the system as set forth in claims 1-7 and 13-19.
